For 1992, volumes 86-93 (48 issues) have been announced. The subscription price for these volumes is Dfl. 2760.00 (US$ 1380.00). Postage and handling amount to Dfl. 248.00 (US$ 124.00). Therefore the total price for 1992 is Dfl. 3008.00 (US$ 1504.00). The Dutch guilder price is definitive, dollar prices are for guidance only.

Subscriptions should be sent to the publisher, Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, Amsterdam, The Netherlands, or to any subscription agent or bookseller. Claims for issues not received should be made within three months of publication. If not, they cannot be honoured free of charge.

© 1992 Elsevier Science Publishers B.V. All rights reserved. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior permission of the publisher, Elsevier Science Publishers B.V. (North-Holland Physics Publishing Division), P.O. Box 103, 1000 AC Amsterdam, The Netherlands.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the USA. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US$ 2.25, also payable through the Center. (N.B. For review journals this fee is $ 0.25 per copy per page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of product liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

US mailing notice - Optics Communications (ISSN 0030-4018) is published bi-monthly in 1992 by Elsevier Science Publishers (Molenwerf 1, 1000 AE Amsterdam, The Netherlands). Annual subscription price in the USA US$ 1504.00 (subject to change), including air speed delivery. Application to mail at second class postage is pending at Jamaica, NY 11431.

USA Postmasters: Send address changes to: Optics Communications Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003. Airfreight and mailing in the USA by Publication Expediting.

North-Holland Delta Series

The Delta Series includes a selection of carefully edited volumes providing timely reviews and state-of-the-art reports in all fields of physics. Both established and emerging fields are covered, thus presenting a broad range of topics at the forefront of today's physics.

Geometrical and Algebraic Aspects of Nonlinear Field Theory

S. De Filippo, M. Marinaro, G. Marmo and G. Vilasi *(editors)*

1989 x + 248 pages. US $81.00/Dfl.158.00
ISBN 0-444-87359-7

High Gain, High Power Free Electron Laser: Physics and Application to TeV Particle Acceleration

R. Bonifacio, L. De Salvo Souza and C. Pellegrini *(editors)*

1989 xvi + 310 pages. US $99.50/Dfl.194.00
ISBN 0-444-87395-3

Turbulence and Nonlinear Dynamics in MHD Flows

M. Meneguzzi, A. Pouquet and P.L. Sulem *(editors)*

1989 x + 280 pages. US $99.50/Dfl.194.00
ISBN 0-444-87396-1

Nonlinear Phenomena in Complex Systems

A.N. Proto *(editor)*

1989 viii + 256 pages. US $110.50/Dfl.215.00
ISBN 0-444-88035-6

Scattering in Volumes and Surfaces

M. Nieto-Vesperinas and J. Dainty *(editors)*

1990 viii + 324 pages. US $94.50/Dfl.184.00
ISBN 0-444-88529-3

Between Science and Technology

A. Sarlemijn and P.A. Kroes *(editors)*

1990 viii + 214 pages. US $48.50/Dfl.95.00
ISBN 0-444-88659-1

Strongly Coupled Plasma Physics

S. Ichimaru *(editor)*

1990 xxiv + 708 pages. US $128.00/Dfl.250.00
ISBN 0-444-88363-0

Mechanics, Analysis and Geometry: 200 Years after Lagrange

M. Francaviglia *(editor)*

1991 xii + 560 pages. US $123.00/Dfl.240.00
ISBN 0-444-88958-2

Thermal Field Theories

H. Ezawa, T. Arimitsu and Y. Hasimoto *(editors)*

1991 xvi + 606 pages. US $115.50/Dfl.225.00
ISBN 0-444-88903-5

Nonlinear Phenomena in Fluids, Solids and Other Complex Systems

P. Cordero and B. Nachtergaele *(editors)*

1991 xii + 482 pages. US $115.50/Dfl.225.00
ISBN 0-444-88791-1

Neutron, X-Ray and Light Scattering

P. Lindner and T. Zemb *(editors)*

1991 x + 376 pages. US $89.50/Dfl.175.00
ISBN 0-444-88946-9

Photochemical Processes in Organized Molecular Systems

K. Honda *(editor)*

1991 xiv + 538 pages US $102.50/Dfl.200.00
ISBN 0-444-88878-0

Handbook on Synchrotron Radiation, Volume 4

Medical, Biological and Physiological Applications

edited by **S. Ebashi, M. Koch** *and* **E. Rubenstein**

1991 xiv + 764 pages Price: US $ 210.00 / Dfl. 410.00 ISBN 0-444-87423-2

The first three volumes in this series were mainly devoted to applications of Synchrotron Radiation in various fields of physics and chemistry. Volume 4 covers in a self-contained manner the properties of sources, elements of instrumentation and applications to biological and medical research. The exception confirming the rule is EXAFS where it was felt that this topic at the border between inorganic chemistry and biochemistry was adequately covered in previous volumes and in several recently published textbooks. Each chapter provides an introduction for newcomers as well as a reference for more advanced researchers. In conclusion this is a unique book providing a comprehensive overview of the use of synchrotron radiation in biology and medicine.

Contents: Preface. 1. Synchrotron X-ray scattering studies of Langmuir films *(J. Als-Nielsen and H. Möwald)*. 2. Coronory angiography project at the Photon Factory using a large monochromatic beam *(K. Hyodo, K. Nishimura and M. Ando)*. 3. Optical and dielectric properties of materials relevant to biological research *(M.W. Williams, E.T. Arakawa and T. Inagaki)*. 4. Crystal-structure analysis of biological macromolecules by synchrotron-radiation diffraction *(H.D. Bartunik)*. 5. Fibre diffraction: collagen *(A. Bigi and N. Roveri)*. 6. Scattering from non-crystalline systems *(M.H.J. Koch)*. 7. Synchrotron radiation sources *(W. Brefeld and P. Gürtler)*. 8. A Bragg reflection monochromator for synchrotron radiation angiography *(G.S. Brown)*. 9. Trace element analysis by X-ray fluorescence *(A. Iida and Y. Goshi)*. 10. Medical applications of synchrotron radiation *(J.C. Giacomini and H.J. Gordon)*. 11. Microradiography and microtomography *(W. Graeff and K. Engelke)*. 12. NIKOS - non-invasive angiography at HASYLAB *(W. Graeff and W.-R. Dix)*. 13. Radiobiological experiments in the X-ray region with synchrotron radiation *(K. Hieda and T. Ito)*. 14. Synchrotron radiation for angiography, an overview *(E. Rubenstein and R. Hofstadter)*. 15. X-ray microscopy *(G. Schmahl and P.-C. Cheng)*. 16. UV-spectroscopy *(E.S. Stevens)*. 17. Anomalous X-ray diffraction scattering *(H.B. Stuhrmann, G. Goerigk and B. Munk)*. 18. Detectors for angiography *(A. Thompson)*. 19. Progress in X-ray synchrotron diffraction studies of muscle contraction *(K. Wakabayashi and Y. Amemiya)*. 20A. Imaging apparatus and techniques for synchrotron radiation *(H.D. Zeman)*. 20B. The processing of intravenous coronary angiograms produced by synchrotron radiation *(H.D. Zeman)*. Author index. Subject index.

Instructions to authors

The journal publishes short communications and full length articles in the field of optics and quantum electronics.

Short communications are brief reports of significant, original and timely research results that warrant rapid publication. The length of short communications is limited to six printed pages.

Full length articles are subject to the same criteria of significance and originality but give a more complete and detailed account of the research results. The discussion of experiments should bear sufficient relation to theory, and theoretical papers should refer to experimental verification.

All manuscripts should contain an abstract and an introduction. In addition, full length articles need a conclusions section.

Manuscripts. Manuscripts should be typed double spaced. Special care should be taken of those symbols which might cause confusion. All Greek characters and unusual symbols should be identified in the margin the first time they occur in the text. All references should be numbered sequentially, between brackets, and should contain the initials and names of all authors, e.g. "[1] A. Kitadon and B. Hauskai, Optics Comm. 99 (1999) 999". References should not contain footnotes. No manuscripts will be returned unless requested by the author.

Figures. Figures should be original drawings, laser printer outputs, or sharp glossy prints of about manuscript size. Xerox copies usually do not give good results. Lettering should be done in such a way that the figures can be reduced to one-column width (7.5 cm) with the reduced lettering at least 2 mm. All figures should have captions typed on a separate page.

Colour illustrations. Illustrations in colour can be accepted where the use of colour is essential to the presentation. The decision on this rests with the Editors. The Publisher and the Author will each bear part of the extra costs involved. For the Author these costs will be Dfl. 1000 for the first page containing colour and Dfl. 500 for each additional page with colour, independent of the number of colour figures on each page. These prices are exclusive of Value Added Tax (VAT). Colour illustrations should be submitted as original colour photographs, transparencies, or 35 mm slides. Polaroid colour prints are *not* suitable. Please submit colour photographs and transparencies close to the size expected in publication. It should be noted that, in some instances, printing requirements will prevent figures from being located at the most desirable position in the text. The author receives 200 reprints with colour illustrations free of charge. More reprints can be ordered at the usual rates, and there will be *no* additional charge for reprints containing colour illustrations.

Submission. Contributions written in clear English should be sent in triplicate to one of the editors whose addresses are given on the inside of the journal cover. Authors are advised to submit their paper to a geographically convenient editor.

Proofs. Authors of short communications will not receive proofs, unless they request them at the time of submission. Authors of full length articles will receive proofs.

Correspondence. All correspondence with the editors or publisher should contain full reference to the paper concerned, i.e. the full title, the names of all the authors as well as the date of submission. The letter of submission should include, if possible: the full mailing address, telephone, FAX, telex and bitnet number. Once the contribution has been accepted for publication, all further correspondence should be directed to the publisher: Drs. H. Oosterom, Editorial Department, North-Holland (Elsevier Science Publishers), P.O. Box 103, 1000 AC Amsterdam, The Netherlands; telephone 31-20-5862632, FAX 31-20-5862319, telex 10704 espom nl, or Bitnet NHPDESKED©ELSEVIER.NL

For purposes of compiling a **subject index** authors are requested to index their manuscript according to the following classification list:

1. *Propagation and transmission in homogeneous media* (interference, diffraction, coherence, polarization, geometrical optics, optical measurement techniques).
2. *Propagation and transmission in inhomogeneous media* (coherence in random turbulent media, scintillation, scattering from haze, fog, dust, etc., atmospheric optics).
3. *Optical information, image formation and analysis, optical computing* (Fourier transform optics, modulation and optical transfer functions, optical storage and retrieval, holography, pattern recognition, image processing and restoration, speckle).
4. *Optical communications* (optical waveguides, fiber optics).
5. *Atomic and molecular physics* (atomic and molecular spectra and interactions with photons, atomic and molecular collision processes and interaction, use of optical techniques for determining other properties).
6. *Condensed matter* (spectroscopy, optical properties of materials, use of optical techniques for determining other properties).
7. *Plasmas.*
8. *Lasers* (including laser beam interactions and applications).
9. *Nonlinear optics* (stimulated Raman, photon echoes, parametric oscillations and other interactions of radiation with matter, harmonic generation, bistability, beam trapping, self-induced transparency and related effects).
10. *X-ray optics and applications.*

In the absence of such indications by the author, the classification will be done by the Editor.

ANNOUNCEMENT AND CALL FOR PAPERS

11-14 January 1993

Paris (France)

ICSE '93

FIRST INTERNATIONAL CONFERENCE ON SPECTROSCOPIC ELLIPSOMETRY

The conference is organised jointly by:
Laboratoire de Spectroscopie en Lumière Polarisée (ESPCI and CNRS, Paris)
Laboratoire d'Optique des Solides (Université P. et M. Curie and CNRS, Paris)

Scope

The aim of the conference is to bring together specialists active in the field of Spectroscopic Ellipsometry (S.E.) and related areas. Both the characterisation of a wide range of materials and the development of the technique itself will be considered. Sessions will be organised covering the following topics:

- film growth and real time S.E.
- instrumentation (UV to IR)
- modelling and simulation
- anisotropic materials and surface anisotropy
- semiconductors and high-Tc superconductors
- adsorption and biological studies
- liquids
- thin films

Abstracts of contributions should be received not later than **August 1, 1992** by the Secretariat of the conference.

All participants will receive the proceedings of the conference which is to be published as a special issue in the journal **Thin Solid Films**, published by Elsevier Sequoia, Lausanne, Switzerland.
